| PURPOSE                           | To document the DPAS politoyensuresufficient exposure of students to that meet the program defined expectations for clinical experiences, as well as the process of acquisition of clinical sites or preceptors. |  |                            |                     |           |                   |  |
| POLICY                            |  | re notequired to<br>e for all rotation a | •                          |                     | •         | •                 |  |

The DPAS requires a minimum number of patient experiences based on settings, patient demographics, clinical practice and types of encounter the student must meet. Students can also log procedures associatedh

Evaluation Preceptor Final Evaluation) eviewed in cojunction to patient tracking data. To ensure that all students meet their program defined benchmarks, any student who reports insufficient patient encounters will be addressed through subsequent student SCPE assignments.

Additionally, the Typhon logging system is used to compare student experiences across
